

Changes at Latauspolku

Signing in through the phone app has been replaced by a web app. From now on, use the charging cabinet through your browser.

WEB APP ADDRESS

latauspolku.frif.fi

Works in your phone's browser. No app installation needed. The web app is in Finnish only.

SCAN WITH CAMERA

How to charge a battery

- 1 Open **latauspolku.frif.fi** in your browser, or scan the QR code above.
- 2 Sign in with the **same credentials** you used in the app. No new account is needed. If you don't remember your password, select **Unohtuiko salasana?** (forgot password) on the sign-in page and follow the instructions.
- 3 Select a free bay and open it from the web app.
- 4 Connect the battery to the charger and close the bay door.

IF THE APP IS ALREADY ON YOUR PHONE

A previously installed phone app keeps working as before. It can no longer be downloaded from the app stores, so on a new phone or for a new user, signing in always happens in the browser.
